

The New Hampshire Public Health Association (NHPHA)

For over a quarter of a century, the New Hampshire Public Health Association (NHPHA) has been a trusted, unbiased, consistent voice advancing public health policies and practices, based on evolving trends, scientific evidence, and accurate data.

During the COVID-19 crisis, we are serving as one of NH's COVID 19 thought leaders, and a leading advocate for the equitable and effective distribution of the vaccines across NH.

Thanks to the support of our members, sponsors, and donors, we accomplish our mission through these three strategic priorities:

- *Strengthen the public health workforce through engagement and professional development activities*
- *Develop and implement strategic communications to inspire a public health movement*
- *Champion public health policy and advocacy*

NHPHA Member Benefits

- Advocacy at the NH Legislature on issues of concern to the citizens of NH, and timely messaging on public health bills before the Legislature
- Communications and information on key public health events and emerging topics, like COVID-19
- Networking with peers at educational and social events, and through our extensive members-only listserv
- Access to our members-only student intern database, student intern stipends, and job postings
- The opportunity to participate in our mentor/protégé program, *and much more*

Academic partner members also receive these additional NHPHA benefits:

- Opportunities for students to exhibit scholarly posters at meetings
- Professional mentorship opportunities for students and recent alumni
- Marketing and sponsorship opportunities at career fairs and NHPHA offerings
- Skill building workshops for your students
- A seat on the NHPHA *Rising Stars Advisory Committee* to shape workforce development activities, *and much more*
