

The New Hampshire Public Health Association (NHPHA)

For over a quarter of a century, the New Hampshire Public Health Association (NHPHA) has been a trusted, unbiased, consistent voice advancing public health policies and practices, based on evolving trends, scientific evidence, and accurate data.

During the COVID-19 crisis, we are serving as one of NH's COVID 19 thought leaders, and a leading advocate for the equitable and effective distribution of the vaccines across NH.

Thanks to the support of our members, sponsors, and donors, we accomplish our mission through these three strategic priorities:

- *Strengthen the public health workforce through engagement and professional development activities*
- *Develop and implement strategic communications to inspire a public health movement*
- *Champion public health policy and advocacy*

NHPHA Member Benefits

- Advocacy at the NH Legislature on issues of concern to the citizens of NH, and timely messaging on public health bills before the Legislature
- Communications and information on key public health events and emerging topics, like COVID-19
- Networking with peers at educational and social events, and through our extensive members-only listserv
- Access to our members-only student intern database, student intern stipends, and job postings
- The opportunity to participate in our mentor/protégé program, *and much more*

Regional public health network, local, or state health department members receive these additional NHPHA benefits:

- Discounted professional development opportunities for your staff through our educational offerings, both live and via webinar
- Networking with hospital and health system partners to promote the integration of primary care and public health
- Advocacy at the NH Legislature in support of workforce and community vitality
- Multimedia communications promoting a culture of health
- Public recognition of your support on the NHPHA website, with a hyperlink back to your organization's website, *and much more*
